

Evidence pack

Individual build portfolio. One pack after each of Days 1 to 6.

PACK NUMBER

DAY

STUDENT ID

DATE OF LAB

COMPONENTS BUILT

numbers and names, from the table in section 7 of the scenario

How to use this form

Type into the boxes. Add your diagram and screenshots as pages after this form, number them, and write each page number in the box it belongs to. Save the whole pack as one PDF and submit that.

1 What was built (diagram)

A diagram of the components built today, in context of the whole Thara architecture. Hand-drawn and photographed is acceptable if legible. Say which page it is on and what it shows.

2 Key configuration

The screenshots and outputs listed under "Evidence required" on the lab sheet. List each one here with its page number, in the lab sheet's order.

☐ The middle digits of my account id are masked in every screenshot.☐ No secret access key appears in any screenshot or output.

3 Prove it

The verification output. Paste text output here; give the page number of any screenshot.

4 Break it

Record the fault from the lab sheet's break-it section. Use the second row only if you met a fault of your own.

Fault introduced	Symptom	Evidence that located it	Fix	Minutes

5 Cost ledger row(s) for today

Copy the rows from your ledger. Include the Cost Explorer screenshot for the day and give its page number.

6 Teardown proof

A screenshot showing the bounded-window resources deleted and the persistent ones stopped. Give its page number and say what it shows.

7 Reflection (150 words maximum)

One thing that behaved differently from what you expected, what you did about it, and what you now understand.
